PLAS - O - GRAM <96-11-22>

PLASites,

The alert folks at DCMC McDonnell Douglas, St. Louis pointed out that I had inadvertently assigned some new ACAT I programs to previously used program codes. The PLAS program codes were changed 22 November in PLAS for the following four newly added programs:

New Code	Program
NF034	SBIRS (had been NF030)
ND035	JSIPS CIGS (had been NF031)
NF048	AIM-9X (had been NN043)
NN049	NSSN (had been NN044)

The following program titles have been restored so that the correct titles show when viewing program history.

Code	Correct Program Title
NF030	F-15
NF031	B1-13
NN043	AV-8
NN044	HARPOON

However, none of these programs is currently on the OSD ACAT I listing so none of them will be visible as a national program. AS always, if a command desires to track data for any program not on the national list of PLAS program codes, a local program code may be established.

Again, I apologize for any confusion that this may have caused and ask you to make sure all PLAS administrators are aware of this change.

Boy, is my PLAS red!

Al Greve
